- The transaction starts with sequential amortisation and therefore initially only the Senior Quota will receive principal payments;
- The transaction switches into pro rata amortisation once an overcollateralisation percentage (i.e. credit enhancement excluding cash collateral) of OC-Percentage for the Senior Quota and OC-Percentage for the Mezzanine Quota has been reached.

Performance Triggers

A Targeted Quota Balance was implemented to assure on a monthly basis that no cash is paid to lower steps in the waterfall unless there is sufficient overcollateralization to support the quotas.
The performance trigger in form of a credit enhancement increase condition will be activated when the cumulative Late Delinquency exceeds the defined limits. In this case the overcollateralization will be increased accordingly.
